PREFACE

Blumenfeld's Alpha-Phonics was created to provide parents, teachers and tutors with a sensible, logical, easy-to-use system for teaching reading. It is an intensive phonics instruction program based on the author's many years of research and experience in the reading instruction field. It answers the need for a practical instruction program that anyone who wants to teach reading can learn to use with a minimum of training.

This Alpha-Phonics Workbook is the centerpiece of the program and contains all of the lessons to be learned by the student. The instructions for teaching the lessons will be found in the Alpha-Phonics Instruction Manual created for easy use by parents, teachers, and tutors. The same instruction is given on the Audio Lesson Tapes, which can be used by parents and teachers unfamiliar with phonics and also by nonreaders for self instruction.

The *Workbook* teaches our alphabetic system — with its 26 letters and 44 sounds — in the following sequence: First, the alphabet, then the short vowels and consonants, the consonant digraphs, followed by the consonant blends, and finally the long vowels in their variety of spellings and our other vowels.

This program can be used to teach reading to beginners of all ages, older students in need of remediation, nonreaders, adults who wish to improve their reading skills, dyslexics, the learning disabled, and non-English speakers who wish to learn to read English and improve their pronunciation.

It can also be used as a supplement to any other reading program being used in the classroom. Its systematic approach to teaching basic phonetic skills makes it particularly valuable to programs that lack such instruction.

The program's step-by-step lessons in large, easy-to-read print make it suitable for both direct one-on-one tutoring and regular classroom use. Parents who wish to teach their children to read at home will find the many learning tools included with the program particularly helpful.

All of the lesson pages were carefully designed to eliminate distraction and help the learner focus his or her attention on the work at hand. The program, as a whole, is flexible enough so that any parent, teacher, or tutor can adapt it to his or her own teaching style or situation.

If you have never taught reading before in this sensible, systematic way, you will be pleasantly surprised by the results.

I like red berry ice cream.

I can ride my bike to the pike.

I will fly my kite at the beach.

We ate a slice of pie.

I will strive to do my best.

We will strive to run a mile each day.

Danny will fix the tire on his bike.

Jenny has a pretty smile.

"Let's play hide and seek," said Jake.

What time is it? It is five o'clock.

Mike likes to ride his bike. Tim likes to drive his car.

They won a nice prize at the fair.

Jean is Jack's wife.

Her doll can cry like a baby.

Mom and Jan like plain rice, but Dad likes spice on his rice.

"I feel fine," Betty said.

The dog ate the bone.

Perry wore a bathrobe.

Jean woke up. Then she woke me up.

A rose is a rose. A rose smells nice.

Dad drove to the store.

He bought some hotdogs and a Coke.

"Come home when you are done," she said.

Mom ate something for lunch.

Betty loves to talk on the phone.

"Tell me more," she said in a soft tone.

I sent Kathy a note. The note was in code.

"Please don't poke and shove," Tom said.

We chose to go to the seashore.

Cursive Alphabet

Introducing Cursive

One of the most important tools of literacy that an individual must acquire is good cursive handwriting. Cursive is a flowing form of handwriting in which all the letters of a word are joined. Manuscript, or print-script, which most children are taught in the first grade, is really a form of hand printing or lettering.

Most schools require children to learn cursive by the third grade. Unfortunately, many children fail to make a good transition from manuscript to cursive mainly because the third-grade curriculum does not provide enough time for or supervision over handwriting development. The result is a poor, often illegible handwriting.

But the simple truth is that most children can be taught cursive in the first grade, thereby eliminating the need for a difficult and chancy transition period in the third grade.

The virtue of teaching cursive in the first grade is that the teacher can spend more time supervising its correct acquisition. Also, students will begin developing an active tool of literacy, which they will be using for the rest of their lives.

The most important task for the parent or tutor in teaching cursive is to make sure that the student learns to hold the writing instrument correctly and form the letters correctly; that is, knowing where the letter starts and where it ends.

Cursive was developed to permit writers to obtain a fast, fluent, legible script with minimum expenditure of energy. It takes time to develop a good cursive handwriting, and that is why it is wise to begin cursive instruction in the first grade.

Most children, as they learn the letter forms, begin writing cursive in a large awkward scrawl. This is quite natural because the child is being required to perform a manual physical task, which requires considerable dexterity and precision. But in a few weeks or months, that scrawl will evolve into a neat, legible script.

There are some youngsters – and adults – who experience great difficulty in learning to write. This is usually a physical problem that has nothing to do with intelligence. This condition is called dysgraphia and can only be overcome with a great deal of practice and perseverance. Dysgraphics usually find it equally hard to learn manuscript as well as cursive. Therefore, it makes sense to concentrate on cursive, since ultimately it is the more useful and required tool of literacy.

It is very important to teach the learner to form the letters correctly the first time, for there is nothing more difficult than trying to break bad habits once they are acquired. Such future agony can be avoided by having the child do it right the first time.

What Parents Say About Alpha-Phonics®

Alpha-Phonics is the most successful home-school reading program for one simple reason—it works! Parents have been talking about the simple, effective *Alpha-Phonics* system for years. Read what they have been saying:

"In six months, we taught our 5-year-old daughter Meghan to read.... Parents really can (and should) teach their children to read.... After teaching our own children to read using *Alpha-Phonics*, we are now better readers and spellers ourselves."

Mr. & Mrs. Howard Walter, Oregon

"Although I'm a nurse with many years of experience, I still doubted my ability to teach. But no more! We started on your book *Alpha-Phonics*, and it is so great to see [my son] Joey progressing so rapidly and asking to do more!"

Rebekah Hutzler-Malatt, W. Virginia

"I was so pleased with the ease of instruction [of *Alpha-Phonics*], the clarity of the book and the response of my son that I felt I should write you and commend you on the results obtained by the *Alpha-Phonics* method. By the time John and I had finished *Alpha-Phonics*, over a period of eight months, John could read and pronounce most any word."

V.L. Goltry, M.D., Idaho

"They say that a satisfied customer is the best advertising. I've certainly sold lots of people on *Alpha-Phonics*. It was so simple and thorough—much better than phonics programs costing much more."

Linda Steigerwald, Virginia

"I had tried two other phonics systems, but they didn't work.... We started using *Alpha-Phonics* last month. It's going great. I really love it, and my son is excited about learning from it."

Patti Clay, Georgia

"I must admit that when I first looked at the teacher's instructions [to *Alpha-Phonics*], I was a little skeptical. There were no frills, and it looked too simple... [However,] in one month we had covered the whole book. And my son went from reading signs to reading books!"

Mrs. Teresa A. Ambra, Massachusetts

"I am convinced [Alpha-Phonics] is the best reading program available to parents who want to teach their children to read."

Ellyn Davis, Tennessee
